

We are hiring: two open positions in BFlow

Project leader and Innovation manager

BFlow (www.b-flow.es) is a growing company offering microfluidic solutions for optimization of drug discovery in phase of internationalization. With cutting-edge technology in an expanding market and the recent incorporation of partners from Zendal and Semola Tech Ventures, it offers the possibility to join a professionalized and growing team and develop your professional career within the company.

We are a spin-off company of the Universidade de Santiago de Compostela (USC) and the Instituto de Investigación Sanitaria de Santiago de Compostela (IDIS). We are located within the USC biotechnology incubator with direct access to numerous research institutes, as well as competitive groups in the areas of Physics, Optics and Biomedicine. In addition, Santiago de Compostela is a welcoming medium size city with high quality of life that has made a significant effort to develop a business network of initiatives with high technological potential and linked to university life.

BFlow offers two positions to fill **Project Leader** and **Innovation Manager** functions in the company. These positions are a unique opportunity to add value to the growing field of biotechnology in Galicia (<https://www.galiciabio.tech/>).

Responsibilities and Functions

Project Leader:

- Develop the company's strategic lines, focusing on their growth, internationalization and process improvement.
- Leader of R&D projects of advanced applications of microfluidic devices.

Innovation Manager:

- Support the research lines of the company, bringing new ideas of optimization in microfluidics and their applications.
- Assist in device development as well as in commercial and marketing activities.

Mandatory requirements

- Bachelor or Degree in Physics and/or Engineering.
- Master in Physics and/or engineering.
- Interest in the field of bioengineering and biotechnology.
- Fluent communication in English.
- Ability to work in a team, creativity, problem solving and initiative.

Valuable requirements

- PhD in Physics and/or Engineering.
- Experience in design and microfabrication techniques.
- Previous R&D experience.

If you are interested, please send us your **complete CV** and **letters of recommendation** to info@b-flow.es. Conditions and remuneration will be accorded to the credited value. More info can be requested at the same email.
