

Dear Colleagues,

You are cordially invited to participate in the **International Conference Diffusion Fundamentals IX held in Krakow, Poland from 21 to 24 September 2022.**

As you may find in the conference website:

https://diffusionfundamentals2021.confer.uj.edu.pl/en_GB/home

the character of the conference is unique. While interdisciplinary lectures delivered by highly renowned invited scientists will present the widest possible spectrum of 'spreading phenomena' observed in nature, as well as in the context of social or economic reality

https://diffusionfundamentals2021.confer.uj.edu.pl/en_GB/invited-speakers,

dynamic and full of enthusiasm poster sessions will provide you with a unique opportunity for discussing your results in a wide group of specialists including the invited lecturers.

You will also be able to choose and join one of the workshops organized by top specialists and devoted to particular topics – see the website

https://diffusionfundamentals2021.confer.uj.edu.pl/en_GB/program

and click Workshops.

In order to participate in this unusual and one-of-a-kind event submit abstracts of your poster presentations by 15 March 2022.

Expected are poster presentations dealing with new aspects of diffusion theory, experiment and application:

Theory: models, computational studies, novel paradigms and tools of theoretical treatment

Experiments: experimental results dealing with fundamental research of diffusion and transport in any kind of matter (solids, fluids, gases, soft matter, interfaces, etc.)

Applications: applied research related to unrestricted spectrum of systems including complex materials, polymers, nanocomposites, self-assembled structures, bio-systems, engineered devices, sensors, etc.

Methods: potentials, versatility and limitations of experimental techniques for measuring diffusion and transport, recent developments and progress

Diffusion-Like Phenomena: studies in other areas such as ecological, economic and social systems

Since diffusion occurs in all types of matter there are, essentially, no limitations to the scope.

In order to submit your abstract please, visit the conference website

https://diffusionfundamentals2021.confer.uj.edu.pl/en_GB/abstracts

and use the provided links:

- to create your personal conference account
- to log into your personal conference account and submit the abstract following the instructions on the screen

Please, submit your abstract by 15 March 2022, so that the organizers are able to notify you on the acceptance by 10 April 2022 and so that you may take advantage of the „early-bird” discounted registration available until 30 April 2022

(see https://diffusionfundamentals2021.confer.uj.edu.pl/en_GB/registration)

Electronic version of an abstract book will be provided in the conference kit.

All the conference participants will be also invited to submit full-length papers which will be subject to a standard peer-reviewing procedure and considered for publication in the Diffusion Fundamentals online journal (<http://diffusion.uni-leipzig.de/>).

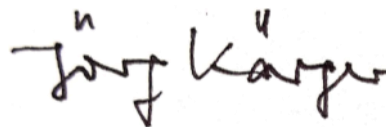

We would greatly appreciate your encouraging the students and your young co-workers to take part in the conference with poster presentations. The idea of focusing the discussion and networking side of the conference on poster sessions should appeal (and has been actually addressed) especially to young people.

Thanks to our sponsors we were able to set a rather low conference fee of about 300 EUR (1500 PLN) and only of about 100 EUR (500 PLN) for students.

We look forward to seeing you in Krakow in September !

Prof. dr hab. Rafal Abdank-Kozubski
Chairman
Jagiellonian University in Krakow, Faculty of
Physics, Astronomy and Applied Computer
Science
Łojasiewicza 11
30-348 Krakow, Poland
